

1st Article Build Service

Need to order 20 boards but want to test a couple first?

Advanced Assembly builds 1st article boards for no additional charge.

- Catch mistakes before they cost you money
- Reduce time spent testing and redesigning
- Shorten your development cycle
- Receive more accurate assemblies with repeatability
- Get products to market on-time or faster

Designs are getting more complicated every day. As components and boards get smaller, having your design work the first time is rare - even for the most experienced engineer. By testing your design with one or two boards first, we can help you meet deadlines and save money.

How it works:

- Send us your files
- We'll build one or two boards and ship in **3 days** or less!
- Test your design and then email any changes
- We'll make the necessary adjustments and finish the remaining build

***So go ahead. Dream it. Design it. Fry it. Do it again.
With Advanced Assembly as a partner, there's no limit to your ideas.***
