

COMPONENT OVERAGES

Advanced Assembly recommends sending extra parts due to possible attrition during the PCB assembly process. We don't experience much loss, but we appreciate having a small amount of overages to avoid any delays in assembly.

OVERAGES

Component	Overage Amount
01005 0201 0402	An addtl. 50 pieces +10%
0603 0805	An addtl. 20 pieces +10%
1206 & higher	Ad addtl. 10 pieces +10%
All other parts	10 extra pieces +10%

NO REELS REQUIRED

You should NOT have to buy entire parts reels for proto and low-volume build requirements. At Advanced Assembly, we can accept parts in any form of packaging:

- ✓ Cut Tape
- ✓ Loose Components
- ✓ Reels
- ✓ Tubes

SHIPPING

Parts that are properly shipped in anti-static carriers or in moisture sensitive packaging will be treated with care while being inventoried and placed. Any unused parts are returned with your job.

Please indicate your Advanced Assembly assigned BUILD # with every shipment (either on the shipping label or packing slip) to make it easier for our team to identify and manage your inventory when it arrives at our dock.

EXAMPLE LABEL:

Advanced Assembly
ATTN: BXXXXX (enter build number here)
